Manual Unifi Setup on Windows 8

Step one
Open File Explorer by moving your mouse to the top right hand corner of the screen and selecting Search from the menu that appears.

In Search select ‘Settings’ and type ‘Network and Sharing Center’. Open the ‘Network and Sharing Center’.

Step two
From the Network and Sharing Center select “Set up a new connection or network”.

Step three
When prompted to ‘Choose a connection option’, select ‘Manually connect to a wireless network’ and then click ‘Next’.

Enter the following settings:

Network name: ‘Unifi’
Security Type: ‘WPA2-Enterprise’

Click ‘Next’.

Step four
After successfully adding Unifi select ‘Change connection settings’.

Successfully added Unifi

Manual Unifi Setup on Windows 8

Step five
In the Unifi Wireless Network Properties select the ‘Security’ tab.

Step six
Where prompted for a network authentication method select ‘Microsoft: Protected EAP (PEAP)’.

Step seven
Uncheck the ‘Verify the server’s identity by validating the certificate’ box.

Click ‘Configure…’

Uncheck the Automatically use my Windows credentials box. Click ‘OK’ and then ‘OK’ again.

More information: www.unifi.uwa.edu.au
Step eight
In the Security tab (picture in step six) click ‘Advanced Settings’.

In Advanced settings, check the ‘Specify authentication mode’ box and choose ‘User authentication’ from the drop down.

Click ‘OK’ and then ‘OK’ again.

Step nine
From the system tray in the lower right corner of your screen, click the wireless network icon pictured below.

Select this icon to open the list of available wireless networks in range of the device.

NOTE: If there is no network icon in the system tray, it may be hidden within the 'less frequently used items' area, which can be expanded by selecting the 'up-arrow', typically on the left-most edge of the system tray.

Step ten
From the list of available networks, select ‘Unifi’ and press the ‘Connect’ button that appears after selecting it.

Step eleven
The connection process will begin and you should be prompted to enter user credentials at the prompt:
Manual Unifi Setup on Windows 8

Username: Your UWA student number
Password: Your Pheme password.

Then press ‘OK’.

Step twelve
The following prompt will appear:

This is normal. Simply press ‘Connect’ to proceed.

You are done!
After a few seconds you should be notified that the connection was established successfully as pictured.

You now have Internet access.

Doesn’t work?
Try the following tips:

- Double-check your student number and Pheme password are correct and have not expired.
- Move around to ensure you are in a location with good wireless reception.

Still doesn’t work? Help is available!
